

HUMBEL ZAHNRÄDER AG

Performance center for development and production of innovative gear technology and high-precision parts, assemblies and gearboxes.

“The **3DEXPERIENCE** platform on cloud greatly enhanced our multi-site engineering collaboration resulting in improved efficiency.”

– Patrick Wirz, CTO, Humbel Gears Group

Challenge

Headquartered in Switzerland with sites in Czech Republic and Romania, Humbel was faced with high IT infrastructure and maintenance costs. In addition, it needed to improve cross-site collaboration to leverage knowledge and know-how across the company.

Solution

The company adopted the **3DEXPERIENCE**® platform on cloud to manage its product development process across sites. With a single click, the cloud solution was ready to use without any lead time or further investment in IT infrastructure. As the company and business grow, the solution can be expanded upon the current needs.

Benefits

The cross-site collaboration and harmonized processes reduced errors and accelerated engineering projects from design to manufacturing. The integrated platform helped the company make better decisions leading to faster time-to-market with high quality products.
